

7/3/99

To whom it may concern:

SUBJECT: Docket #98N-1038

What's Cookin'?

The public has a right to know how our food sources are treated to make them safe for consumption. Irradiated foods must continue to be labeled as such so individuals have a choice when purchasing such items. There is still not enough information in on the safety of this process.

Sincerely,

Jamie Hopkins

98N-1038
